

Capital Gains and Losses

Capital Gain Tax Rates

Tax rates that apply to net capital gain are generally lower than tax rates that apply to other income. These lower rates are called “maximum capital gain rates.” Net capital gain is the amount by which net long-term capital gain for the year is more than net short-term capital loss. The maximum capital gain rates are 0%, 15%, 20%, 25%, and 28%. If tax is calculated using the maximum capital gain rate, and the regular tax computation results in a lower tax, the regular tax computation applies.

2025 Long-Term Capital Gain Maximum Tax Rates			
Taxable Income	Maximum Rate	Taxable Income	Maximum Rate
Single		MFJ or QSS	
\$0 to \$48,350.....	0%	\$0 to \$96,700.....	0%
\$48,351 to \$533,400	15%	\$96,701 to \$600,050	15%
\$533,401 and over.....	20%	\$600,051 and over	20%
HOH		MFS	
\$0 to \$64,750.....	0%	\$0 to \$48,350.....	0%
\$64,751 to \$566,700	15%	\$48,351 to \$300,000	15%
\$566,701 and over.....	20%	\$300,001 and over.....	20%

Special Circumstances

Long-Term Capital Gain Tax Rates	25% • Gain attributable to straight-line depreciation (maximum rate on section 1250 real property).
	28% • Gain or loss from sale or exchange of collectibles. • Taxable part of gain from the sale of qualified small business stock.

Note: These rates apply when taxable income exceeds the 24% tax bracket for regular income tax purposes.

Capital Gain Distributions

Capital gain distributions are paid by a mutual fund or real estate investment trust (REIT) from net realized long-term capital gains.

Capital Loss Limitation/Carryover

Capital Loss Limitation
If capital losses are more than capital gains, the difference must be deducted even if there is no ordinary income to offset it. The annual limit on the amount of capital loss that can be deducted is \$3,000 (\$1,500 for Married Filing Separately).

Wash Sales
If you sell stock at a loss and then repurchase the same or substantially identical stock within 30 days, the loss is generally not deductible. The basis of the newly acquired stock is increased by the amount of the disallowed loss.

Contact Us

There are many events that occur during the year that can affect your tax situation. Preparation of your tax return involves summarizing transactions and events that occurred during the prior year. In most situations, treatment is firmly established at the time the transaction occurs. However, negative tax effects can be avoided by proper planning. Please contact us in advance if you have questions about the tax effects of a transaction or event, including the following:

- Pension or IRA distributions.
- Retirement.
- Significant change in income or deductions.
- Notice from IRS or other revenue department.
- Job change.
- Divorce or separation.
- Marriage.
- Self-employment.
- Attainment of age 59½ or 73.
- Charitable contributions of property in excess of \$5,000.
- Sale or purchase of a business.
- Sale or purchase of a residence or other real estate.

This brochure contains general information for taxpayers and should not be relied upon as the only source of authority. Taxpayers should seek professional tax advice for more information.

Capital Gains and Losses

Capital Gains and Losses

Capital Assets

Most property you own and use for personal or investment purposes is a capital asset. For example, a house, furniture, car, stocks, and bonds are capital assets.

Noncapital Assets

A capital asset is any property held by you except the following.

- Stock in trade or other property included in inventory or held mainly for sale to customers.
- Accounts or notes receivable acquired in the ordinary course of a trade or business for services rendered or from the sale of stock in trade or other property held mainly for sale to customers.
- Depreciable property used in a trade or business, even if it is fully depreciated.
- Real estate used in a trade or business.
- Copyrights, literary, musical, or artistic compositions, letters or memoranda, or similar property created by the individual's personal efforts, prepared or produced for the individual, or received from a person who created the property.
- Supplies regularly used in a trade or business.

Investment Property

Investment property is property held for the production of income or anticipated appreciation in value. A gain or loss from the sale or exchange of investment property, such as stocks and bonds, is a capital gain or loss.

Holding Periods

Capital gains and losses must be separated according to how long you held or owned the property.

Short-Term

The holding period for short-term capital gains and losses is one year or less.

Long-Term

The holding period for long-term capital gains and losses is more than one year.

Inherited Property

Inherited property is considered held long term regardless of actual time held by you, the beneficiary.

Securities Traded on an Established Market

For securities traded on an established securities market, the holding period begins the day after the trade date the securities are purchased and ends on the trade date the securities are sold.

Mutual Funds

A mutual fund is a regulated investment company generally created by pooling funds of investors to allow them to take advantage of a diversity of investments and professional management.

Mutual Fund Basis

Shares in a mutual fund may be acquired at various times, in various quantities, and at various prices. When shares of a mutual fund are sold, it is necessary to determine which shares were sold and the basis of those shares. You can use either a cost basis or an average basis to calculate gain or loss.

Cost basis. Cost basis can be used only if you did not previously use an average basis for a sale of other shares in the same mutual fund. To calculate cost basis, use one of the following methods.

- **Specific share identification.** The adjusted basis of specific shares can be used to calculate gain or loss if those shares are adequately identified. Adequate identification requires you to:
 - 1) Specify to a broker or other agent the particular shares to be sold at the time of the sale, and
 - 2) Receive confirmation in writing from the broker or agent within a reasonable time of your specification of the particular shares sold.
- **First-in first-out (FIFO).** If the shares sold cannot be identified, the oldest shares owned are considered to be sold first.

Average basis. Average basis is calculated by dividing the total cost of shares owned by the total number of shares owned. Once average basis is used to report gain or loss from a mutual fund, it must be used for all accounts in the same fund. However, you may use a different method of calculating the basis for other mutual funds, even those within the same family of funds.

Substantiation. You may not estimate the basis of stock sold. If you cannot prove basis with adequate records, cost basis is zero.

Transfer or Exchange of Mutual Fund Shares

Any exchange of shares in one fund for shares in another fund is treated as a sale. This is true even if shares in one fund are exchanged for shares in another fund within the same family of funds.

Reinvested dividends are dividends paid that you opt to use to buy more shares of stock rather than receive the dividends in cash. The dividends are reported as income, and the shares of stock owned and cost basis increases.
